Enter the quantity to be purchased (Enter 0 to exit): 1

Would you like to purchase a copy of Richmond Underground for $13.95? (Y/N): Yg

Invalid input.   ← [F]

Would you like to purchase a copy of Richmond Underground for $13.95? (Y/N): Y

Your order has been processed. Thank you for your purchase.

Special case 1:

Enter the quantity to be purchased (Enter 0 to exit): 0
You have exited the application. Thank you for visiting.

Special case 2:

Enter the quantity to be purchased (Enter 0 to exit): 2

Would you like to purchase 2 copies of Richmond Underground for $29.90? (Y/N): N

The order has been cancelled.

Scenarios:

A. For most inputs, the application will exit whenever one presses the ENTER key
   with no input.

B. If the user does not enter a number, a message stating so is printed. This case
   applies wherever numbers are only required. If the user enters a number out
   of range, then a message is printed stating so.

C. If the user enters a number out of range when selecting a category, then a
   message is printed stating so. The user can select a category again.

D. As stated in the outline, when the user enters a title that cannot be found,
   he/she is redirected to category selection.

E. Whenever entering numbers that correspond to the listed books, the user is
   prompted to enter one until the input number matches the number of one of
   the titles.

F. Upon order confirmation, the user can enter Y/y for 'yes', or N/n for 'no',
   else the user is prompted again.

 Special case 1: When the user enters 0, the app exits.

    Special case 2: If the user selects 'no', then the app exits stating that the "order has been cancelled".
